

DORMITORY CONTAINER

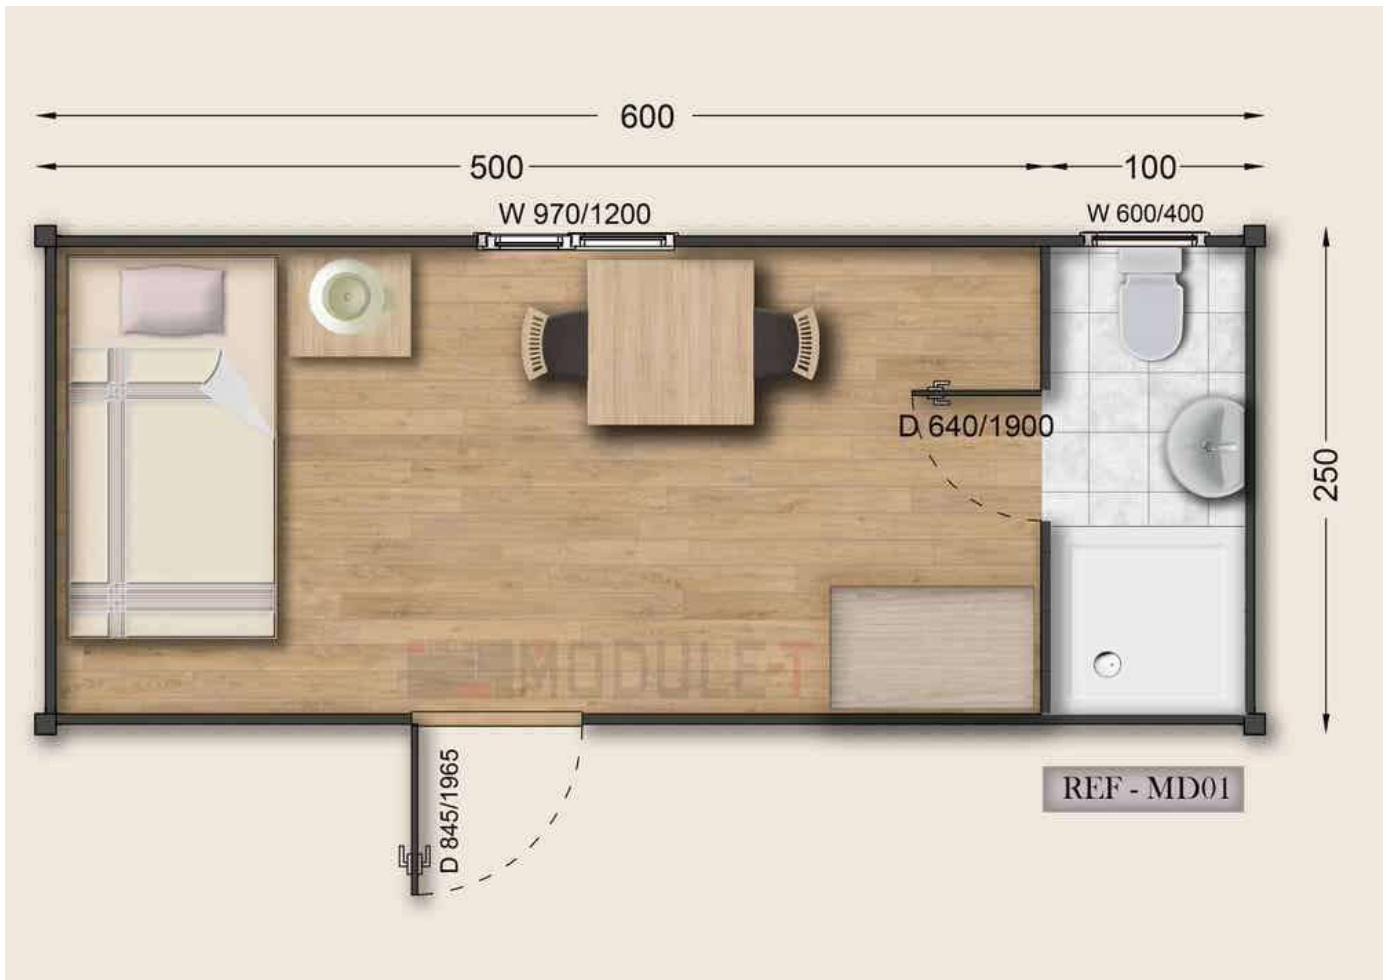

Home (<https://module-t.com/>) / Dormitory Container

The Module-T **dormitory container** is specially designed for the needs and comfort of construction site personnel. Dormitory container is a sandwich panel modular container which is widely used in construction sites, especially in the living spaces of companies operating in the construction and mining sectors. Our **dormitory containers** are delivered as standard, 6,00 × 2,50m or 12,00 × 2,50m in size and 2.60 m in exterior height. To make your container a fully equipped studio, we can add a bathroom (shower and wc) or a kitchenette .

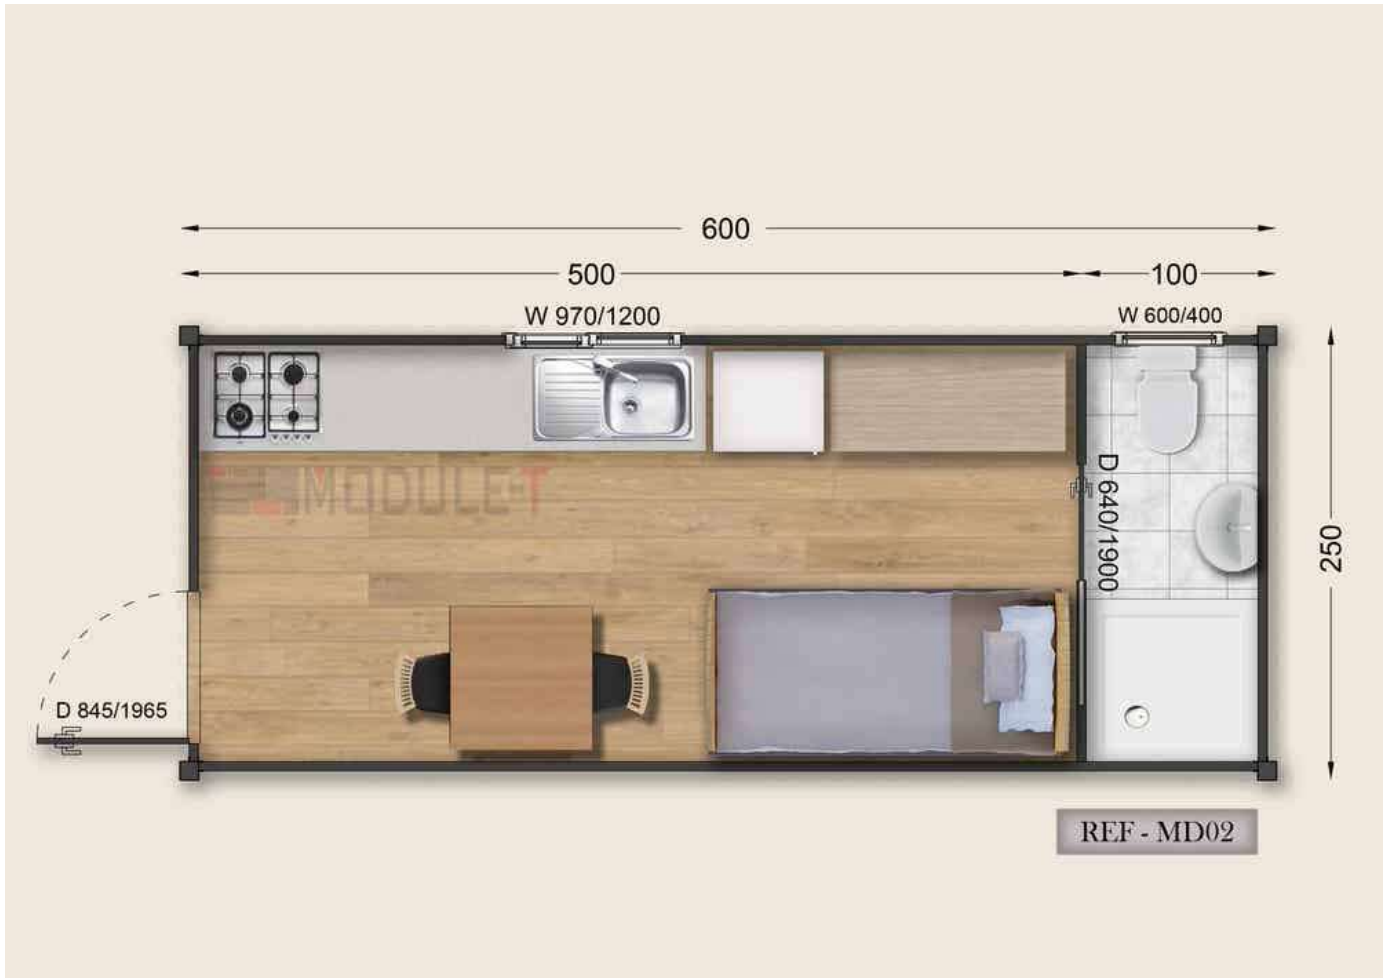

- **Structure:** Dormitory container with high galvanized and painted steel sandwich panel surface and frame (purlin).
- **Walls:** Dormitory container with internal and external walls with sandwich panels and stone wool, polyurethane or polystyrene foam insulation up to 100 mm thickness.
- **Ceiling and Floor:** Polyurethane insulated ceiling (50mm). The base surface is of vinyl-coated fiber cement panel.
- **Quick-mount dormitory container:** A construction site dormitory container with sandwich panel can be installed or dismantled within a few hours. All sandwich panels are cut and painted at the factory. The lower and upper chassis are pre-assembled at the factory.
- **Portable dormitory container:** Module-t dormitory container can be transported with lifting hooks (optional: specially reinforced dormitory container for frequent transport).
- **Flooring:** Dormitory container with vinyl pvc or parquet flooring.
- **Delivery in Set:** Module-T dormitory container is delivered as a set to minimize transport costs by road and sea. Portable dormitory containers are delivered in a special package with a 40-foot sea container. Sanitary equipment, plumbing and additional materials are delivered in packages out of sets.
- **Optional internal arrangement:** Special arrangements can be made for dormitory container and construction site camps upon request. The prefabricated dormitory container can be integrated with a bathroom or a small kitchen.
- **Optional materials:** Bathroom (wc and shower), kitchen equipment, single bed or bunk bed, closet, wardrobe.
- **Connection Set:** You can combine dormitory bungalows with each other to create larger structures for your construction site living spaces.
- Dormitory containers are mounted on a lightweight construction structure: concrete block or beam.
